

---

The app for easy and secure printing  
with Microsoft Dynamics 365 Business Central.

## Your benefits at a glance...

With our **impresa** app, you can print your data securely and locally from the cloud

- ✓ Your data is secure! The print job is transmitted to the local printer in encrypted form.
- ✓ The app is resource-efficient thanks to simple distribution and centralized control.
- ✓ There is currently no comparable standard solution for local printing from the cloud for BC.
- ✓ You save on the high costs of a cloud print server.

**impresa** provides a solution that allows documents from Microsoft Dynamics 365 Business Central (Cloud) to be printed directly on local printers. The printing itself does not take place via the cloud.

This fundamentally distinguishes **impresa** from traditional cloud printing solutions.

The solution is based on a two-tier architecture consisting of a browser-based component and a local Windows service. The browser handles communication with Business Central, while the Windows system controls the processing and forwarding of print jobs to local printers.

The application acts as a secure interface between the cloud system and the local printing environment. When a print job is triggered in Business Central, the print data is transmitted in encrypted form and forwarded specifically to a local instance of **impresa**.

There, it is transferred to the appropriate printer within the local infrastructure. The actual print processing thus takes place exclusively on-site.

This approach ensures that sensitive documents do not leave the company's network without proper oversight. At the same time, it ensures a high level of data security, as the transmission is encrypted and no direct cloud printing takes place.

**impresa** offers clear added value, particularly for Business Central Cloud environments, as there is currently no comparable standard solution for local printing from the cloud. While deployment in on-premises environments is technically possible, the app's focus is clearly on Cloud scenarios where local printers cannot otherwise be connected directly.

In addition to secure print transmission, **impresa** stands out for its simple distribution and centralized control. Print processes can be efficiently managed without setting up additional complex infrastructure. At the same time, the solution is more cost-effective compared to traditional cloud print servers and reduces administrative overhead. Your employees do not need to be on-site for setup. This offers flexibility and saves resources at the same time.

With **impresa**, companies gain a reliable and cost-effective way to print documents from Business Central

- ✓ **LOCALLY**
- ✓ **SECURELY**
- ✓ **CONTROLLED**

## Über PROTAKT

We have a simple quality criterion: The solution must work!

We have been pursuing this goal in our customer projects for over 25 years. Our team develops and implements business solutions based on Microsoft Dynamics 365 Business Central. Our services range from a comprehensive business process analysis and the optimization of your internal business processes to the development of individual modules. We implement your business solution, train your users and offer you tailor-made support.

As a Microsoft partner, we support corporate customers in Germany and Europe.

Our goal is to find the best solution for you. As simple as possible, as complex as necessary.
